2002 vs. 2022

2022

U.S. Transport Emissions

21 32 Million Metric Tons of CO₂ Eq 2002 36 21 Aircraft **31** Ships and Others **69 37** Pipelines 411 41 Rail **357** Trucking Source: Bureau of Transportation Statistics, 2024. Note: Figures are rounded to the nearest whole number.

While GHG emissions from every other form of transportation have grown over two decades, rail freight has cut emissions by almost 25% during the same time.

The Greenbrier Companies are a global leader in freight railcar services, maintenance and parts, propelling transport toward a greener future.
